The foot is the origin of human body, and is where vitality condenses. There are numerous acupressure points at the feet, making them nearly as important as the heart. Most of us, however, spend around 25% of our waking hours standing, walking, or being upright. Inevitably, our feet are subject to great stress. How could we overlook the well-being of feet?

OTO Lite FOOT mimics such massage strokes as kneading, rolling, pressing, scratching and rubbing of a masseur, cherishing attentively your calves, ankles and soles, and aiding in relieving tensed and aching leg muscles. Its 3D massage rollers even take care of the acupressure points at soles, promoting both physical and mental well-being of the body.

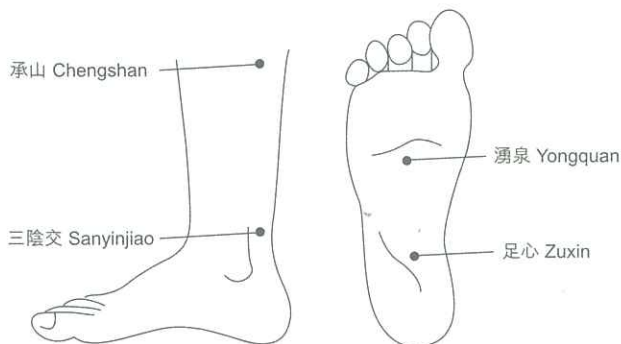

腳部穴位反射按摩小知識 Foot Reflexology Basics

腳部穴位反射按摩是簡單且非侵入性的保健方法，它可助身體恢復和保持最佳的平衡狀態。這種自然療法可讓特定的壓力在那些與身體各部位相對應的反射點上發揮作用，這動作一般是不會有疼痛感的。可是如果在按壓中某些柔嫩的部位感到不適時，那就是您的身體正向您發出警號。經常按壓這些位置可漸漸讓疼痛感減退，讓您越來越享受腳部反射按摩的舒適感的同時，也助您身心回復最佳狀態。

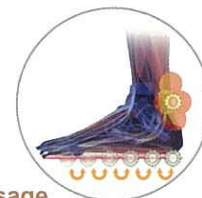

Foot reflexology is a simple, non-invasive way to help your body regain and maintain its optimal balance. It is a natural therapy whereby specific pressure is applied on explicit reflex spots on the feet that correspond to particular parts of your body. This is usually not painful, but one may experience some discomfort especially at the tender areas if your body is highly stressed. When pressure, however, is regularly applied to these areas, they will become less susceptible to pain and foot reflexology becomes increasingly comfortable while improves physical and mental well-being simultaneously.

OTO足輕鬆 可按摩不同的腳部反射穴位，有助舒緩足、背、腰等部位的酸痛及疲勞，強身健體。

OTO Lite FOOT targets such reflex spots as shown above, to name a few, which could help relieve pain and tiredness of legs, back and waist, and overall enhance well-being of the body.
