## WHY MEASURE YOUR BLOOD PRESSURE AT HOME?

Measuring your blood pressure at home can minimize the impact of external environmental influence as blood pressure can be affected by a variety of conditions. Thus it is inaccurate to conclude your blood pressure status based on one reading – instead, a series of readings is required. Having OTO BP-932 at home would allow you to take regular blood pressure readings to monitor your condition anytime.

Systolic Reading  
(pressure when heart contracts)  
收縮壓 (心臟收縮時的血壓)

Diastolic Reading  
(pressure when heart expands)  
舒張壓 (心臟舒張時的血壓)

Pulse Rate 心跳

## WHEN IS THE BEST TIME TO CHECK YOUR BLOOD PRESSURE?

A blood pressure check is best taken in the morning before food, as it will reflect the actual body conditions without external influence. The OTO Digital Blood Pressure Monitor BP-932 allows you to take readings anytime and will also alert you of any fluctuations in your condition so that you can seek medical attention immediately.

## 最適合測量血壓的時間？

測量血壓的最理想時間是早上起床並空腹時，建議用者於每天同一時間測量，因為這能反映血壓沒有受外來因素影響下的狀況。OTO BP-932電子血壓計就能讓您簡易輕鬆地在家中測量血壓，當測出異常數據時，請立即尋求醫生診治，避免延誤。
